The Power of The People

1/7/2021

To all American Patriots:

Since election night we have all witnessed the fraud and corruption that President Trump has spent every day of the last four years fighting against reach new and unprecedented levels. While unfortunately none of this is surprising and was to be expected, it is nonetheless sickening and frustrating to watch. And while President Trump continues to fight he needs to know now more than ever that we the American people have his back and that we are not going to stand by and watch as this election is stolen by a handful of corrupt Democrat controlled states and counties.

Democrat politicians and media propagandist love to talk about the sanctity of our elections. Yet these are the same people that are opposed to any and all efforts to make sure that our elections are secure, like requiring something as simple as a voter ID. Under the Constitution of the United States of America in the 15th Amendment it clearly states that “The right of citizens of the United States to vote shall not be denied ...” the key word in this amendment is that only citizens of the United States have the right to vote in this country. But there are states like California that allow people who are here illegally to vote, which every single illegal vote is an account of voter fraud, this is also a complete disregard for the federal Constitution and for the Rights of the rest of the states that make up this Union. While this country is looked at as a whole it is in fact made up of fifty free and independent states that act separate from each other. The founders of America made sure that they preserved the freedom and independence of each state because each state is different; some are more agricultural while others are more industrial. This is why each state has the right to create its own laws including how they conduct their state elections under Article II. Section 1. Clause Two of the United States Constitution where this power is **exclusively delegated** to the State Legislatures. While every state gets to hold their own elections in order for the citizens to choose their elected Representatives and Senators as well as numerous local offices, there is only one office in this entire country in which every state has a say and that is for the office of the Presidency.

We are currently watching as a handful of corrupt and hate filled individuals in so called “battleground states” are trying to circumvent the rights of every state in this Union through corruption and fraud. There are those that will try to dismiss these claims as nothing more than false allegations, but the American people don’t have to look back very far to see that these claims are true, where in 2012 in

The Power of The People

Pennsylvania County, Pennsylvania a 147% voter turnout was reported and this is only one account of many. The American people regardless of their political preference should be disgusted and outraged by what is taking place. In the weeks and months leading up to the 2020 election there were several “key states” that changed their voting laws, some through Unconstitutional means and the question has to be asked for what purpose, but in every case the changes benefited the Democrat party.

This kind of activity should not and cannot be tolerated by any other State in this Union. This is a call to every single American citizen to contact their State Legislatures, Representatives and Senators to demand that they stand against this kind of corruption and **reject the fraudulent activities taking place in this election and to not demand a recount but a new free and fair election be held in these states and that each registered voter and each legal vote be verified.** With the level of voter fraud that is being exposed, the people need to demand that every other state’s votes be verified and matched to their **living** registered voter lists to ensure that these same corrupt activities were not taking place. Because if this kind of conduct is allowed to continue then there will never be confidence in our election process again. And to all those Republicans out there that are now trying to distance yourselves from President Trump all because he has the fortitude to stand against this corruption, let me tell you something you are prime examples of why the American people have despised the Republican party because you are a bunch of spineless, worthless cowards that are not willing to stand and fight for the American people. Many of you would not be in office today or won reelection if it wasn’t for President Trump revitalizing the Republican Party and being the fighter that he is and if you think that the American people will forget your actions you are sorely mistaken. President Trump is out there fulfilling his Constitutional duty to make sure that the laws are faithfully executed and if you are not standing with him than you are standing against the Constitution that you all take an oath to uphold.

If there is one thing that all of this has exposed is that there is a serious need for a unified voting system across this country. Especially a system that takes power away from these corrupt counties and cities in “battleground states” who time and time again have tried to sway a Presidential election to their political views. It is my personal opinion that every state should be a battleground state and that a change needs to be made as to how a state’s Electoral College votes are distributed. I feel that a Presidential candidate should have to win a majority of the counties of each state in order to win their Electoral votes. This would take the power away from the larger cities and would make every county regardless of how large or how

The Power of The People

small equally important. **Thus helping us the American citizens to form a more perfect Union.**

I ask is it fair for every American voter who has exercised their right to vote which is guaranteed by the Constitution of the United States of America to be deemed void and rejected by these fraudulent and corrupt activities that have been taking place in our United States elections. It is past time to bring an end to this ongoing corruption and that we the people of the United States stand together and demand that we take care of this problem now. This corruption directly affects each and every citizen and when we stand together we are the ultimate power.

The American people have far more power than the politicians of this country would ever what you to know about. The people have the power to end all of this corruption and this comes through the brilliance and forethought that our Founder's put into the founding documents of this great country. Our Founder's did not always see eye to eye in terms of political policy but the one thing that they were unified in was that tyranny at any level cannot be tolerated. If the Founders could see the level of corruption that this country has fallen into, they would be the first ones to rise up and stand against the tyranny that we see unfolding today.

Sincerely,
Your fellow Patriot in
